DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Inomata (US 5,495,327).

Inomata discloses a rotary developing apparatus having a plurality of developing devices (9, 10, 11, 12) mounted along an outer periphery of a cylindrical rotary unit, cam (17), the rotary developing apparatus including a first gear train (23b, 19) for connecting the rotary unit (17) to a drive source (M) to rotate the rotary unit (17); a second gear train (23a, 21) for connecting only a developing device (9) revolved and stopped at a developing position, as a result of the rotary unit (17) being rotationally driven, to the drive source (M) to drive the developing device (9); and drive switching means (23a) for switching between the first gear train and the second gear train to connect either of them to the drive source (M).

Regarding claim 2, the first gear train connects the drive source (M) to an input gear (19) of the rotary unit (17) through a rotary drive gear (18), and the second gear train connects the drive source (M) to an input gear (21) of the developing device (9) through a development drive gear (20).

Regarding claims 6 and 7, the drive source (M) alternately drives the first gear (19) and the second gear (21).

Art Unit: 2852

Regarding claim 8, the rotary unit (17) is rotated to successively move the developing devices (9, 10, 11, 12) to a developing position.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, and 6-11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,748,188.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed invention of the application is obvious over the Patent. The scopes of the claims differ, but all of the limitations of the claims of the application are claimed in the Patent.

Regarding claims 9-11, the claims are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art at the time the invention was made that the claimed invention of the Patent could connected the first gear train to the drive source either when the solenoid is not energized as it is one of two equivalent and obvious possibilities for the configuration of the solenoid.

Response to Arguments

Applicant's arguments with respect to claims 1, 2, 4-8 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 4, 5, and 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
